CYPRUS INVESTMENT PROGRAM - UPDATES

2019 was a very successful year with passport applications reaching already over the quota of 700. Submissions are still being accepted; however, examination of files will probably happen during 2020/2021.

This has not changed the demand for this Program, although people are pushing to get their submission done urgently; a huge urgency has been created by this news so a promising 2020 is already showing for such investments.
