## COVID-19 POLICY

In these unprecedented times of pandemic, TIMC has quickly adapted to the current situation introducing a COVID sanitary policy.

TIMC is committed to providing a safe environment for our clients, employees, partners, visitors, and suppliers. We are following all necessary sanitary measures as per guidance of public health officials. These measures include masking, social distancing, proper hygienic procedures, symptomatic monitoring, and full immunization.

We would like to reassure our customers, partners and suppliers that we abide to the safest precautions during our business encounters whether it be in our workplace or when traveling across the world. Interactions can be done with confidence as TIMC requires all employees to be fully vaccinated.

TIMC also requires that the same COVID measures are implemented by all clients, partners and suppliers dealing with us.

Stay safe,

Your TIMC team
